

AI-READY ACCEPTANCE CRITERIA TEMPLATE

One feature per copy. Fill all four before building.

1. INTENT

One sentence. The outcome and the user.
Who is better off, and how.

2. CONSTRAINTS

What must not happen. The boundaries.
The assumptions nobody wrote down.

3. EXAMPLES

Two or three input and output pairs.
At least one messy. At least one empty.

4. DISCONFIRMING TESTS

How you would prove it wrong.
Not how you would demo it.

DONE WHEN

Someone who was not in the room can argue
with it before any code exists.
