

DASHBOARD-TO-DECISION AUDIT

One record per active metric. Run it with the people who read the metric, not the people who built it.

METRIC	_____
READ BY	_____
LAST CHANGED	_____
IF GONE	_____
VERDICT	keep / cut / merge into _____

DECISION RULE

A metric that has not changed a decision in 30 days is a candidate for removal. Not removed.
A candidate, with a case to answer.

RENT

Obligated metrics (compliance, board rollups, contractual reporting) go on a separate list. They are not audited here and they are not a fourth verdict. Keep, cut, and merge remain the only three.

GUARDRAIL

A metric that exists to fire on an event you hope never happens changes no decisions by design.
IF GONE is the line that saves it.

DONE WHEN: every active metric carries a verdict, and every cut or merge has an owner and a date.
